seedless

Simple & Private. Native on Solana.

$300K Pre-Seed · SAFE

MOBILE WALLET · PASSKEY-FIRST · PRIVACY BY DEFAULT

The Problem

Wallets still ship 2017 UX. Most users will never write down 12 words.

12

Words to Write Down

Single point of failure. Lose them, lose everything.

92%

Onboarding Drop-off

Users quit before their first transaction.

$0

Gas Before First Use

Buy SOL to do anything. Chicken-and-egg.

100%

Public by Default

Every Solana payment broadcast to the world.

The Solution

Open the app. Authenticate with your face. Transact.

Passkey Auth

Keys live in the device secure enclave. Never exported.

Gasless

Paymaster sponsors fees. Zero SOL needed to start.

Private by Default

Encrypted accounts & shielded sends, powered by Umbra.

Who This Is For

The next 100M users won't write down a seed. They'll tap.

Mobile-Money User

Sends on M-Pesa daily. Never touched crypto.

Global Freelancer

Wants USDC payments without wallet friction.

Privacy-Conscious

Doesn't want every payment broadcast publicly.

The Burned User

Lost funds to a bad seed backup. Done with that.

Traction

Real holders. Real product. Daily commits.

4	343	1.07B	Daily
BETA PHASES SHIPPED	REAL $SEED HOLDERS	$SEED HELD	GITHUB COMMITS

- Audited (public, Solana Foundation-backed)
- Listed on CoinGecko
- Delaware C-corp
- Android + iOS dev builds live
- Helius CEO public co-sign
- Live in $4M Bags Hackathon

Live in the $4M Bags Hackathon

Four production integrations. All Face-ID signed. No seed. No gas.

Fee Sharing Claims

Claim SEED fees on-chain in one Face ID tap.

Gasless Swap via Bags

Bags trade routes wired natively. Zero SOL needed.

Random Reward Drops

Real SOL airdropped to weighted-random SEED holders.

In-App Token Launch

Full Bags launch flow native to Seedless.

Accepted **Mar 13** · Submission window **Apr 22-28** · Bags Fund eligible

SUBMITTING

Privacy Under the Hood

Partnering with Umbra Privacy — encrypted accounts, shielded balances, anonymous send.

seedless × umbra

Replacing in-house stealth + burner with Umbra's MPC-backed privacy SDK. Building against the Frontier hackathon side-track.

Encrypted Accounts

State encrypted via X25519 + MPC. Only you decrypt.

Shielded Balances

Holdings hidden on-chain. Solana stays public, you don't.

Anonymous Send

Sender, receiver, amount unlinkable via ZK proofs.

Helius × Seedless

Infrastructure partner. Public validation from Solana's largest RPC provider.

> *“thanks for the trust!”*
>
> **Mert Mumtaz** — CEO, Helius · Apr 15 2026

RPC Infrastructure

Same rails as Jupiter, Tensor, Drift.

DAS API

SEED holder snapshots tracked via DAS.

Ecosystem Signal

Warm line for deeper partnership opens.

Roadmap

Mainnet next. Distribution after.

DONE
MVP + 4 Betas
Audited program, devnet betas shipped

DONE
Brand + Token
Rebrand, $SEED, 343 holders

NOW
Hackathons + Privacy
Bags + Frontier, Umbra build

Q2 2026
Mainnet
Audit done, partner cert pending, flip imminent

Q2-Q3
iOS + Growth
App Store, ground distribution

Q3-Q4
Scale
SDK, partners, 10K+ wallets

The Raise

Pre-seed. Founder-led. Mainnet-imminent. Audit-cleared.

ROUND TERMS

$300K

SAFE · YC standard post-money. 3-month runway to mainnet + first 10K users.

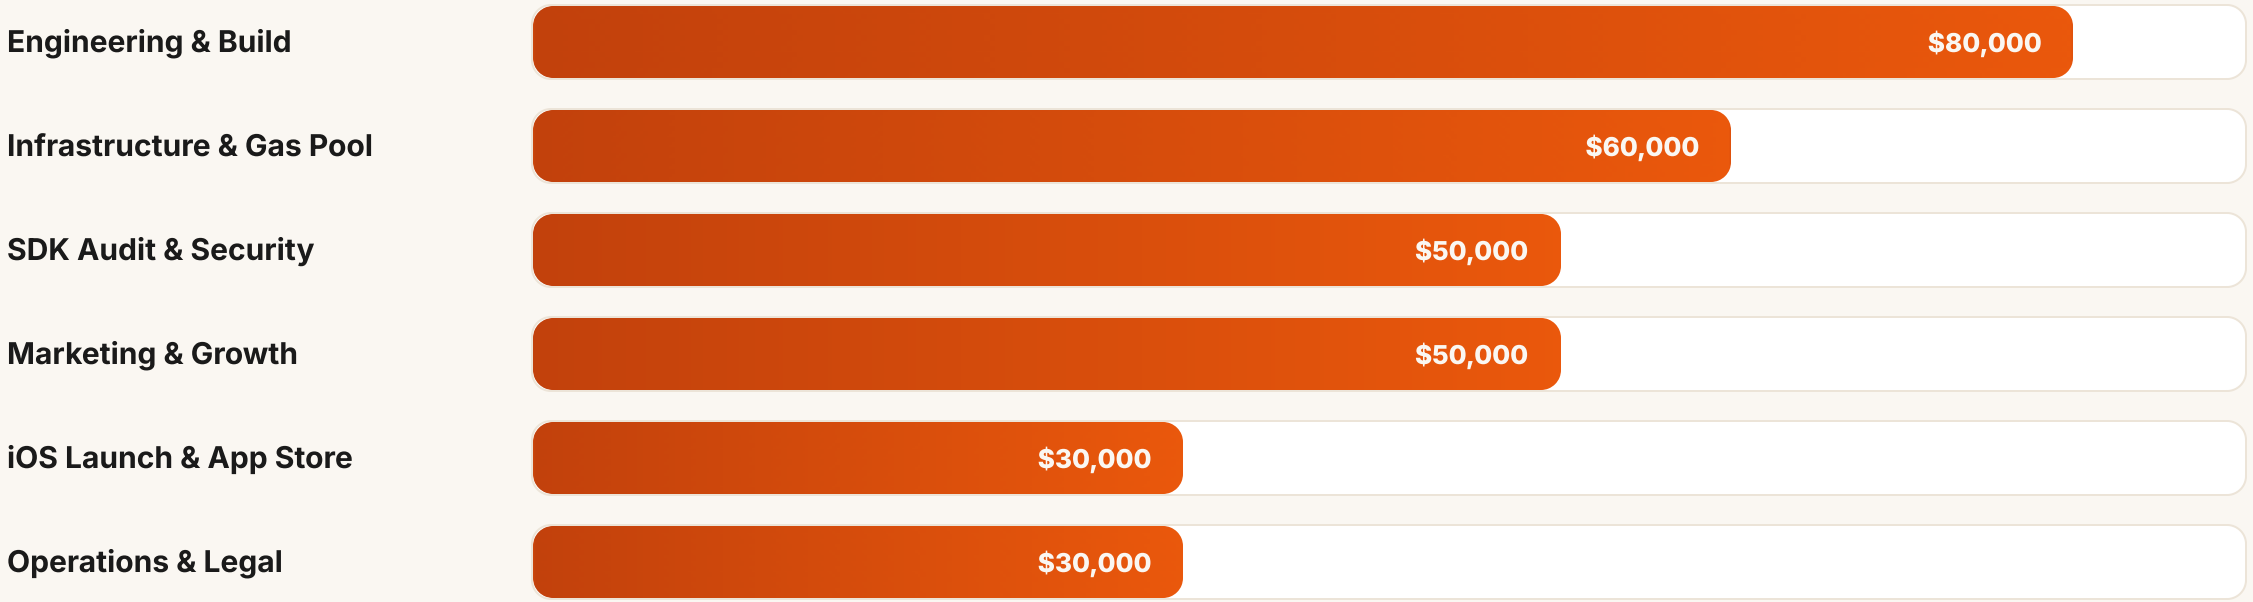
WHY NOW

- Program audit complete
- Live in $4M Bags Hackathon
- Helius CEO public co-sign
- Umbra privacy integration shipping
- 343 holders pre-mainnet

The ask: Capital to mainnet, App Store launch, and 10K real users on the ground in emerging markets. We shipped before raising — that's the proof.

Use of Funds

3-month deployment to mainnet + first 10K users.



Total Pre-Seed Raise **$300,000**

seedless

The wallet that makes seed phrases obsolete.
